Dear Investor

Thank you for downloading
Indigo's guide to 'Vault Like
A Professional: The
Most Secure Vaulting Solution'.

This guide is one in many I've put together to help investors make informed decisions on investing in metals. It's tailored to new investors in the field of gold, silver and other precious metals, and to well-established investors seeking more relevant information in governing their investment decisions.

If you have any questions after reading this free guide, please contact me directly. You'll find my details below.

Professional Vaulted The Most Secure Fully Allocated And Segregated Vaulting Solution

New Buyers

We fully understand the psychological hurdles NEW buyers to this asset class need to overcome. It's easy enough to understand why one needs to be exposed to physical metals as the sole title-holder and legal owner. But, to embrace this as an active asset class, and manage your own vaulted account, can feel overwhelming at first.

We're here to guide you every step of the way.

Allocated & Segregated

Our client's metals are held in their segregated vaulted account under their family name with our world-renowned third-party vaulting partner **Malca-Amit**.

Our company has no ownership title whatsoever.

The vast majority of bullion dealers around the world hold metals on behalf of their clients, which means the legal title ownership actually falls to the dealer.

This isn't the case when you buy and store with IPM Group. You're guaranteed **100% client title ownership**, segregated with no hidden costs in the safest and most advanced vaulting system in the world.

Fully Insured

An allocated metal account involves the secure storage of explicit numbered gold, silver, platinum, palladium or rhodium bars or specified coins with years of mintage stated.

These are segregated in sealed, tamper-proof bags within the vaults at 'Le Freeport' of Singapore.

Allocated account customers receive quarterly statements and vault storage invoices. Customer holdings are wholly segregated and fully insured by **Lloyds of London**

Free Trade Zone (FTZ)

Also sometimes referred to as a "**bonded area**", a FTZ is a specific class of special economic zone with a **100% duty-free exemption** where goods may be landed, handled, sold or stored without the intervention of the customs authorities. Outside

Outside the banking system - Your bullion is stored in a private vault outside of the banking system in a world renowned vaulting facility. Safe deposit boxes are available on request.

How you store your private wealth allocation is important

How you store your private wealth allocation is important. We support and encourage investors who wish to collect their precious metal investments personally, or take delivery of them via insured shipment. This method works perfectly well for smaller allocations and certainly contributes to a regular saving scheme.

But, if you want to hold and trade metals as the professionals, family trusts, and wealthy do, engaging Indigo Precious Metals to act on your behalf is the best way to benefit from the following:

- + Complete protection
- + Full liquidity of any sized holdings (*allowing you to sell quickly*)
- + Legal minimisation of tax
- + Best market prices
- + All unique bar numbers checked and quoted, complete with full certificate as applicable.
- + Held outside of the banking and financial system
- + Personal wholly segregated client vaulting with direct personal control
- + One of the world's most secure vaulting facilities
- + Fully insured by Lloyds of London
- + Complete privacy and confidentiality
- + Inspection visits welcomed and encouraged
- + Regular inventory audits
- + Zero solvency risks (*Your vaulted account is held solely under your own family name*)

At **IPM Group**, we work solely with top-tier vaulting companies including **Malca-Amit**, Brinks and the Baird Mint in London.

We have longstanding wholesale storage agreements with these organisations due to the volumes we carry and import on behalf of our clients.

We facilitate the purchase of **Gold, Silver, Platinum, Rhodium** and **Palladium** at best market prices. We can also source and vault rarer metals such as **Ruthenium, Rhenium, Tellurium** and **Indium**.

Transact with us in US\$, GBP, Euro, Sing\$ or MYR on the latest live prices updated every few minutes.

STEP 01

Open your personal vaulted account.

To open a wholly allocated vaulted account you can either.

Contact us directly

Download and fill out our account application form(s) found at the very top of the page found here: www.indigopreciousmetals.com/vaulting-details

Once you've completed the forms, you can email them to info@indigopreciousmetals.com

Alternatively post them to

IPM Group Pte Ltd,
30 Cecil Street,
#19-08, PRUDENTIAL
TOWER, SINGAPORE
049705.

NB: Please remember to submit the required identification documentation listed on the account opening form. We accept copies when you submit your forms by email.

Once we've received all your documents, we will process them and carry out due diligence. Our vaulting agents will then send out your vaulting contracts to be checked and signed.

In some cases, we are able to expedite vault openings on behalf of clients: the process can take as little as 24 hours, so please advise us of any particular requirements.

We're always available to advise you, so please call if you have any queries.

Please also note: we always recommend naming "Authorised Persons" to your vaulted account. These are usually spouses, siblings or children. This circumvents any death probate issues: in the event of decease, your vault will instantly fall into the ownership of the persons stated.

STEP 02

Decide on the allocation of metals to be vaulted.

When looking at the breakdown of your portfolio of metals, you need to take into account a number of things.

At Indigo, we have a great deal of knowledge and expertise in the individual drivers of each metal and the effects the financial markets can have upon them. Our primary focus is on the overall returns you can hope to achieve, based on the metals in question and the physical product mix.

It's also important to factor in long-term capital gains tax implications. We can advise you on the correct product purchases to legally avoid this tax completely.

We'll help you understand

- + The correct metal diversification depending on your individual circumstances
- + The profit potential of your portfolio
- + The characteristics of each metal, taking into account the size of your order and any premiums
- + The tax implications, depending on your sovereign country citizenship.

** The percentages demonstrated in this pie chart are examples only*

Platinum and Rhodium (known as Platinum Group Metals or PGMs) makes quite a heavy weighting in our pie chart above due to their present market price undervaluation.

The decision-making process doesn't need to be a burden. At Indigo, we have a great deal of experience and knowledge on metal prices and their drivers. We'll advise you at every step.

STEP 03

Fund your purchase or use store credit.

We offer clients the opportunity to pre-credit an online account.

This facility, accessible online using confidential login details, is purely for your convenience: it takes times to transfer funds, and you may wish to be ready to purchase physical metals at a favourable price.

Credit in your account will automatically push your purchase through, guaranteeing the price and delivery of your products.

Once fully cleared in our accounts, any funds you transfer will be immediately credited to your online-funds-balance in any of the following currencies: **US\$, GBP, Euro, Sing\$** or **MYR**.

You can also run multiple currency accounts and transfer balances between them.

If you do not wish to use credit, and would prefer to pay for transactions as you implement invoices, we offer a **10% deposit** option.

Paying just **10%** by card or PayPal allows you to guarantee the prices of the metals you are investing in. You can then pay the remaining sum over the next few days: the price will not change.

Please note: if you wish to pay 100% by bank transfer, we can only guarantee prices if funds are received in our accounts the same working day. In the event of a late payment, we reserve the right to adjust your quotation based on the latest metals prices: this may result in a higher or lower price overall, which we will ask you to approve. Alternatively, we can cancel your order: there is no risk to you or your money.

STEP 04

Your metals are vaulted. Expect your reports.

Once funds are cleared your metal purchases are then submitted into your personal vault. The client will receive several sets of documents...

SSOR - Storage Service Order & Receipt, effectively a detailed "Inventory In Report" detailing your metal submissions including the serial numbers of the bars. Two managers of the vaulting agent team will sign the document.

Vaulted Report - This is the actual report of your vaulting contents, with full specifications of metals given, plus the date of vaulting and the number of days in the vault. This report will be sent every quarter, although clients can request to receive it monthly.

Insurance Certificate - Once we receive back all original signed paperwork, you will receive your personal vaulted insurance certificate.

How do the physical bars get transported to the segregated storage within Freeport facility in Singapore?

The bars are airfreighted directly from (for example) the mint in London to Freeport in Singapore. They are weighed, x-rayed, taken into the vault, re-examined by our premier vaulting agent and vaulted.

Will the physical bars be traceable and insured during the transfer?

You have no risk whatsoever as we are fully insured. Once submitted into the vault you will also receive an Insurance certificate issued by Lloyds of London for the full contents of your vault to the vaulted inventory of your vault, in your own family name.

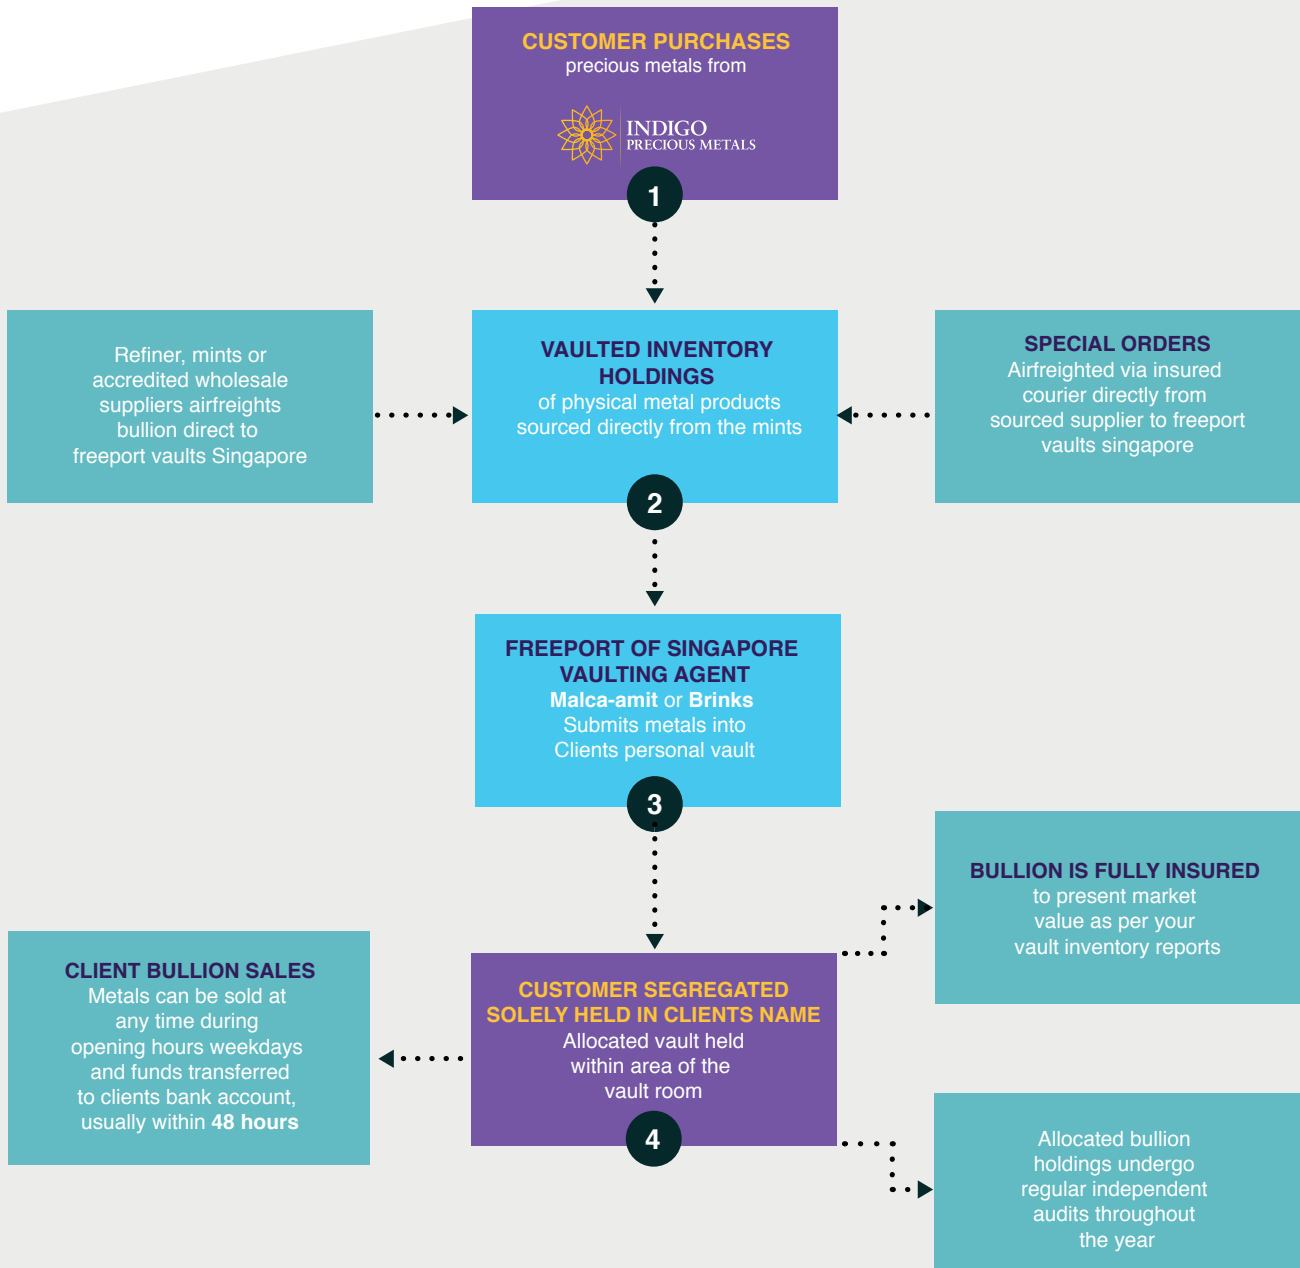

Your vault is also independently audited on a six-monthly basis.

We also offer vaulting facilities in Switzerland and London.

Bonded Client Vaulting Flow Chart Diagram

Singapore Freeport Bonded Vaulting Facility

Please Note: Our client's metals are held in their wholly segregated vaulted account under the client's family name. We have no ownership title whatsoever.

The vast majority of bullion dealers around the world hold metals on behalf of their clients as sub-accounts. In this case, the legal title ownership actually falls to the dealer. This isn't the case when you buy and store with **IPM Group**.

We guarantee 100% client title ownership with no hidden costs in the safest and most advanced vaulting system in the world.

Low Competitive Storage Charges

Note: We reserve the right to change the vaulting storage costs, giving one month prior notice.

The storage costs are charged daily. New charges below as of 1st July 2017

	Value Held in US\$ 5k to 49k	Value Held in US\$ 50k to 149k	Value Held in US\$ 150k to >
Gold (Market bars or coins)	0.52% per annum	0.40% per annum	0.30% per annum
Platinum	0.55% per annum	0.40% per annum	0.30% per annum
Palladium)	0.55% per annum	0.40% per annum	0.35% per annum
Rhodium	0.55% per annum	0.45% per annum	0.35% per annum
Silver (Market bars or coins)	0.70% per annum	0.65% per annum	0.55% per annum
Rare Earths	Each metal has differing charges - please request		

Example: Sing\$ 75,000 in gold bars charged at 0.40%, hence $75,000 * 0.004 / 365 = S\0.822 cents per day.

Each release charge of metal holdings is **US\$ 25.00** (or part thereof of overall holdings).
